VI.BE.MAC.'S 2261HP & 2262HP FEED OF THE ARM UNITS

Vi.Be.Mac. is one of the leading Company in Automatic Sewing Machines Area. Its business in India has been successful for almost three decades, and it will continue to be one of the key markets thanks to the long lasting business cooperation with E.H. Turel Company, the first overseas agent for Vi.Be.Mac..

Vi.Be.Mac.'s aim is very clear: developing automatic sewing machines able to obtain high quality garments, and at the same time reducing all the running costs. In fact power consumption is the lowest ever, and thanks to highly performing devices, waste has been reduced to the minimum.

All these aspects can be fully found in the feed of the arm series, 3 needle chain stitch, for double lap seaming on jeans, casual trousers, work clothes and denim clothes in general. Vi.Be.Mac.'s feed of the arm units 2261HP & 2262HP (reverse lap version) are strong, fast, precise, consistent in the stitch length even on the thickest parts! They're particularly suitable to sew back yoke, back rise,

inseam and out seams, plus top stitch operations. Do not have rivals also when used for shirts.

The units boast a special puller, that grants very fast feeding and perfect matching between the sewn parts. The incredibly high stitching speed allows a production incomparable in the market! And it can be achieved thanks to several outstanding features, like oil lubrication, design and construction quality, and a special sensor for the dynamic presser foot control (DCP system) that avoids skip stitching troubles also on the crotch stitch thickness, the most critical point for every feed of the arm unit existing in the market. Moreover, thanks to the DCP system the stitching length will be constant and the operator

job much easier (no need to pull/push to match the 2 parts).

The different needle gauges grant maximum flexibility: the machine is provided to sew heavy materials but it is also possible to modify it by purchasing the light fabric kit.

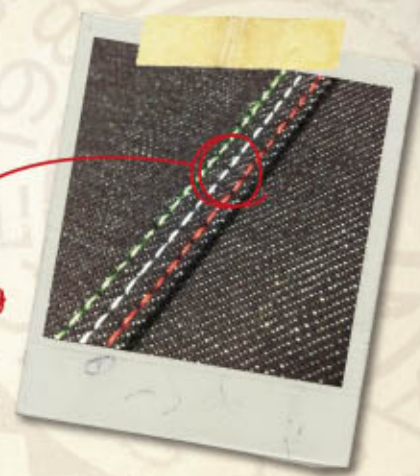

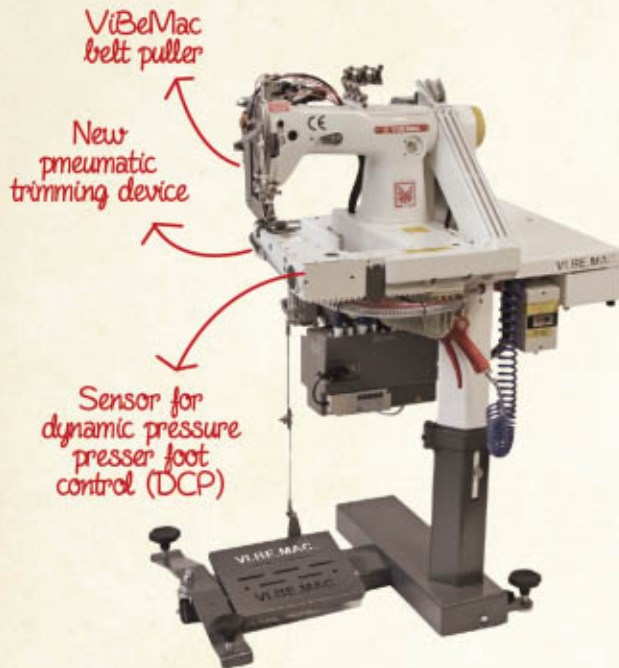

The pneumatic trimming device is provided with a special sensor, that is designed to minimize the wear of the cutting blades.

2261 HP

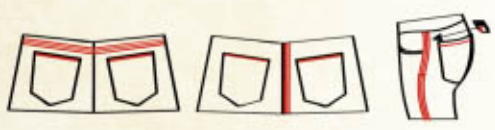

3 NEEDLE CHAIN STITCH FEED OF THE ARM UNIT

Constant stitching length thanks to puller & DCP system

SPECIFICATIONS

- ✓ Max Sewing Speed: 4999 rpm
- ✓ Stitching Length: from 0,9 to 4,5 mm
- ✓ Standard Needle Gauge: 1/4" (6,4 mm)
- ✓ Optional Needle Gauge: 9/32" (7,2 mm)
3/8" (9,6 mm) - 1/4" + 1/8" (MIX 9,6 mm)
3/16" (4,8 mm) 2 needles - 5/16" (7,9 mm)
- ✓ Sewing Head: Vi.Be.Mac. 3 needle chain stitch

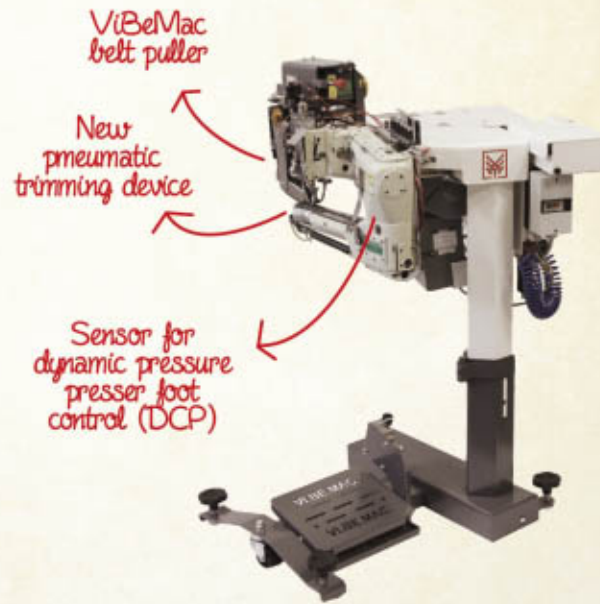

SPECIFICATIONS

- ✓ Max Sewing Speed: 4000 rpm
- ✓ Stitching Length: from 2,1 to 4,2 mm
- ✓ Standard Needle Gauge: 1/4" (6,4 mm)
- ✓ Optional Needle Gauge: 9/32" (7,2 mm)

2262 HP

3 NEEDLE REVERSE FEED OF THE ARM UNIT
