JULY 2016

# V800 AS

AUTOMATIC BUSTED SEAM MACHINE

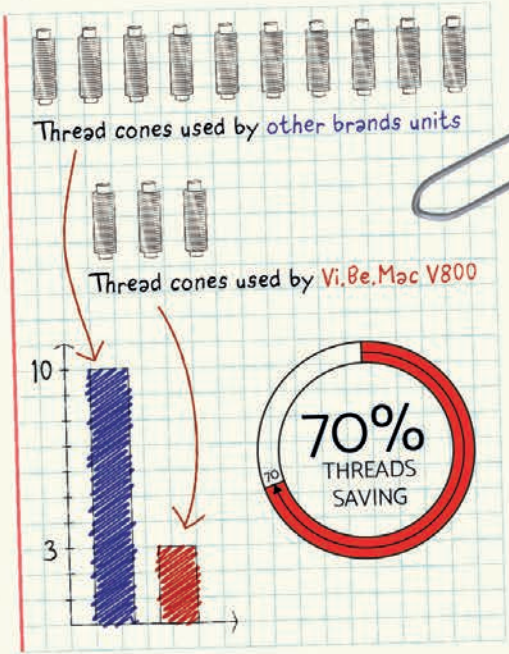

DPC SYSTEM  
SPECIAL PNEUMATIC CYLINDER  
SPECIAL CUTTING DEVICE

4 LT OF EXTRA OIL PUMPED INTO AN INTERCOOLER ENGINE PATENTED

THE WORLD DENIM FASHION:  
BUSTED OUT SEAM

## SPECIFICATIONS

- ✓ Speed: 6300 rpm
- ✓ Max Speed: 7000 rpm
- ✓ Overlock width: 6.0 mm to 9.6 mm
- ✓ Stitch per Inch: up to 30 (spi)
- ✓ 4 litres extra oil, forced oil device with intercooler pump (patented)
- ✓ Special cutting device HSS blade (patented) with vacuum and photocell, long last cutter blade + 50%, threads saving 70%

# V800 AS - AUTOMATIC BUSTED SEAM MACHINE

The V800 AS is an automatic busted seam serging machine using a super fast overlock sewing head exclusively made for Vi.Be.Mac. in Japan by Yamato.

It is today the best possible solution for all the quality & productivity problems that might occur when performing the the side seam serging operation in the jeans production.

The latest technical solutions applied to this unit include improved sewing performances, more flexibility and incredible stitching quality, but they also focus on the long durability of its parts and components in order to keep the same performances after years of work under extreme conditions like 3 working shifts per day.

The speed has been increased to reach 7000 maximum rpm with 9,6 mm stitching length.

The innovative air transport system allows to stitch ANY kind of fabric, from light to heavy, even stretch or double stretch, on top the first and the only which can perform on back panel with the back yoke joint already stitched on, thanks only to our automatic back yoke joint detector!

The V800 AS is also loaded with patented amazing new solutions focused on "Vibemac built to last attitude" like: 4 litres extra oil, forced oil device with inter cooler pump (patented), 100% cut scraps vacuum device, special cutting device with HSS blade (patented), provided with vacuum and sensor, long lasting cutting blade +50% and threads saving over +70% and last but not least an extra pneumatic cylinder assistance on the cutting device.

As on all the Vi.Be.Mac. units the attention of our engineers to the operator working comfort and the technicians who operate on the machines' maintenance is at the top; in fact the stand as usual is adjustable in height. Also the new internal automatic stacker is exclusively designed by our R&D team, safe in use and space saving in the production line, and a sliding upper table, easy to open, easy to work on!

Forget about the manual side seam operation with its huge problems like low productivity and operator manual quality results, just switch to automation with the V800 AS, which will ALWAYS output the best possible quality.

If all these amazing features have affected you, please do not hesitate to contact VBM at the address

sales@vbm-grp.com, or please contact the local branches at the addresses sales@vbm-in.com (India), sales@vbm-ae.com (UAE), sales@vbm-eg.com (Egypt), sales@vbm-bd.com (Bangladesh) or sales@vbm-mx.com (Mexico).

To get more infos about Vi.Be.Mac. units, please visit our website [www.vibemac.com](http://www.vibemac.com), or check our youtube channel [www.youtube.com/VIBEMACSpa](http://www.youtube.com/VIBEMACSpa), in order to see the machines at work in a real production line.
