VI.BE.MAC DOUBLE COLOR BACK POCKET SETTER 2516V4 DCT

Patented in 2008, Double color technology is one of the innovative ideas of Carlo Guerreschi, head of Vibemac's R&D department and Company founder 35 years ago. Mr Guerreschi has been a pioneer in the jeans technology since the beginning, and between his widespread inventions there are:

- System of fabric transportation (currently used application)
- System of dynamic control of pressure (DCP), developed and assembled on the units with reverse arm
- Automatic pocket setter machine (a guarantee of beneficial production costs)
- First automatic belt loop setter on the market.

The worldwide first patented by Vi.Be.Mac double color back pocket setter (DCT - Double Color Technology) is model 2516V4 DCT, equipped with 2 needles to stitch 2 threads in 2 different colours in one single sewing cycle.

Thanks to the 2 split needle bars it is possible to skip automatically from one needle to the other following the sewing pattern.

The 2516V4 DCT applies any kind of pre-pressed patch pockets (round, square, pockets with zip, asymmetric pockets) on jeans and casual trousers, army-pants and work wear. Also, with the unit is possible to apply labels, sew darts and pleats, flaps, to embroider back pockets, patch cargo pockets.

The patented loading-holding system allows the complete freedom of style of stitching any kind of pattern the fashion style requests. The cost of the moulds is the cheapest worldwide, delivered by ViBeMac in 3 working

days, they can even be made locally. By means of the user friendly touch screen panel it is extremely easy to create any kind of pattern.

Please visit Vi.Be.Mac.'s youtube channel at www.youtube.com/VIBEMACSpa to see the units working in a real production line or visit www.vibemac.com to get more infos. For further information, write an email at the following addresses: sales@vbm-grp.com, sales@vbm-bd.com (Bangladesh), sales@vbm-ae.com (United Arab Emirates), sales@vbm-in.com (India).
